FINANCIAL AND COMMERCIAL.

PRICES ALL AT SEA. Dealings Lapse Into Idleness-Disposition to Await Events. New York, Aug. 31.-The month of

August came to a dull and uninteresting close in the stock market today. The dealings lapsed into idleness and prices drifted listlessly. No one showed willingness to take a decided stand in the speculation. The number of derelopments ahead which are deemed mportant from the speculative standpoint might account for the determined waiting attitude. The early part of September is to bring the government reports on the various crops, the Cop-per Producers' association statistics, the United States Steel corporation statement of unfilled tonnage orders on the first of the month, besides various political events, for which a growing interest is being shown in the speculation. The end of the present week brings a triple heliday, to bridge an interval before these expected events begin to occur. Some occupaon was provided in the financial district in the preparation for the month-ly money settlements. Otherwise the isposition was to sit and await

The September payments will amount to \$92,483,000, according to the com-putation of the Journal of Commerce, and the details of the estimate show hat the amount is \$12,048,000 greater han in September of last year, with \$8,549,000 of that amount on account of increased dividend disbursements. The growth of prosperous conditions this implied had some effect in maintaining the firm undertone of the al-most lifeless market. The remainder the increase for interest account is in to the additions to bond and note sues since last year. Various comthe course of the day, and here also was seen an enhancement of profits ovement of several individual stocks. The strong current of the cash move-ment away from New York was a factor in the suspense in which the speculation in stocks was held. Subreasury operations have taken from the banks already since the last bank statement 36,480,000, and slipments to the interior and to Canada are being made on a large scale. The effect is showing in the rates for time loans, which have been marked up a fraction, and in the call loan market, which is uling appreciably firmer, in spite of he almost purely nominal demand in that department. The character of the testimony being offered by railroad officials in the rate hearing before the interstate commerce commission in-vites to discussion in the stock market and to very mixed views as to the probable effect on stock prices. Any strengthening of chances for higher strengthening of chances for higher prices of stocks, but the arguments offered on behalf of the plea for higher rates are calculated to depress values. The conflict of these factors is an element

Reading, Union Pacific and United States Steel again absorbed the bulk of the dealings. Aggregate sales of all stocks fell to a total of 160,000 shares, and when from this is deducted the 36,100 shares of the three active stocks mentioned, the narrowness of the general market may be violated.
